A photograph of a modern bathroom vanity. Two sleek, chrome-finished faucets are mounted on a dark, textured stone countertop. The faucets have a minimalist, rectangular design with a curved spout. The countertop features a circular drain with a grid pattern. The background is a light-colored, veined stone wall. The lighting is soft and even, highlighting the metallic surfaces of the faucets.

M-POWER™ Sensor-Operated Faucet / 8551

 **MOEN**®
C O M M E R C I A L

Products that address your highest priorities.

From leaks and vandalism to normal wear and tear, worries never cease where commercial and institutional fixtures are concerned. That's why Moen® Commercial engineers and designers think of every imaginable scenario — and plan for it in advance. The result is a full line of faucets and valves every facilities manager can rely on from the number one faucet brand in North America.

Our products will help you:

- reduce maintenance costs
- resist vandalism
- save water while maintaining performance
- cut your total cost of ownership

On the pages ahead, we welcome you to discover all the reasons you can count on Moen Commercial to provide the best solutions for your most challenging environments.

M•POWER Sensor-Operated Flush Valve / 8312 Series

nnov

No one surpasses the durability or ease of maintenance built into our faucets and valves.

Our heavy-duty, medium-duty and sensor-operated fixtures stand up to heavy use even in the most demanding environments. In addition, our innovations streamline maintenance and repairs, saving both time and money. With thoughtful design, we provide superior products that exceed users' needs while delivering lower lifetime costs for today's modern facilities. With Moen® Commercial, you can count on all these benefits.

ations

No battery replacement is needed for an estimated eight years with M•POWER™ sensor-operated flush valves and faucets*. M•POWER uses standard AA batteries with no need to purchase specialty batteries. Flush valves feature a manual override button that ensures the system is always operational, even if there's a power outage.

Above-deck models offer easy to access battery packs and mechanics. An LED display shows when batteries need replacing.

*See product specifications for full battery life details.

Faucets resist vandalism thanks to models with recessed aerators and tamperproof screws.

Softened angles and lack of recesses resist dirt buildup and permit easy cleaning.

AccuSet™ piston technology means virtually no maintenance or replacement parts are necessary for the life of the flush valve, thanks to a self-cleaning internal filter screen and self-lubricating seals to guard against damage and leaks caused by particles in the water. Variations in water pressure won't affect the reliable performance of the flush valve.

No tools are needed to program flow rates and a variety of other settings for M•POWER flush valves. Maintenance crews can easily adjust flow rates and other settings using hand gestures.

Our pressure-independent design gives users a **consistent faucet handle feel** even if pressure varies.

These and many other features ensure excellent performance across our entire product line. What's more, you always have the assurance of our best-in-class Five-Year Limited Warranty and outstanding customer service.

commi

We're here to help you meet every challenge.

Anticipating every need, your Moen® Commercial representative will help you find the right solutions that will serve you well for years. With our experienced guidance, you'll not only satisfy regulations and requirements, but also create aesthetic environments thanks to our trendsetting, residential-inspired styles.

Your representative is committed to ensuring your fixtures' suitability for demanding uses, as indicated by the following symbols:

We offer many products which meet WaterSense® criteria to contribute toward meeting LEED® standards and maximizing LEED points*. While helping you achieve ambitious environmental standards, Moen Commercial can also help you ensure essential function. For instance, installing extremely low-flow fixtures that save water could end up being costlier elsewhere. Without enough water pressure to clear pipes of solids, performance, maintenance and sanitation can quickly become serious issues. Exceedingly low-flow fixtures also provide consumers with a disappointing experience. Being LEED certified doesn't mean sacrificing performance to save water. With the guidance of a Moen Commercial representative, you can build beautifully efficient properties without increasing health risks and downgrading the consumer experience.

*Projects pursuing LEED certification earn points across several areas that address sustainability issues, and based on the number of points achieved, a project receives one of four LEED rating levels: Certified, Silver, Gold or Platinum.

ment

With the growing demand for eco-friendly products, Moen Commercial offers many fixtures whose water savings exceed industry standards.

With very few exceptions, fixtures from Moen Commercial comply with the Americans with Disabilities Act (ADA).

A wide range of our products meet the current requirements of the Buy American Act (BAA).

Moen® Five-Year Limited Warranty

We're so confident in the performance of our products that we back them with a Five-Year Limited Warranty. If they should ever drip, leak or prove to have a finish defect, we'll send you the replacement parts, free of charge. Just call 1-800-BUY-MOEN or see your Moen dealer for complete details.

Moen products comply with the Safe Drinking Water Act's stringent lead safety standards. Each product in this catalog has been identified by the following icons where applicable:

NSF 61/9 and 372 compliant

NSF 372 compliant

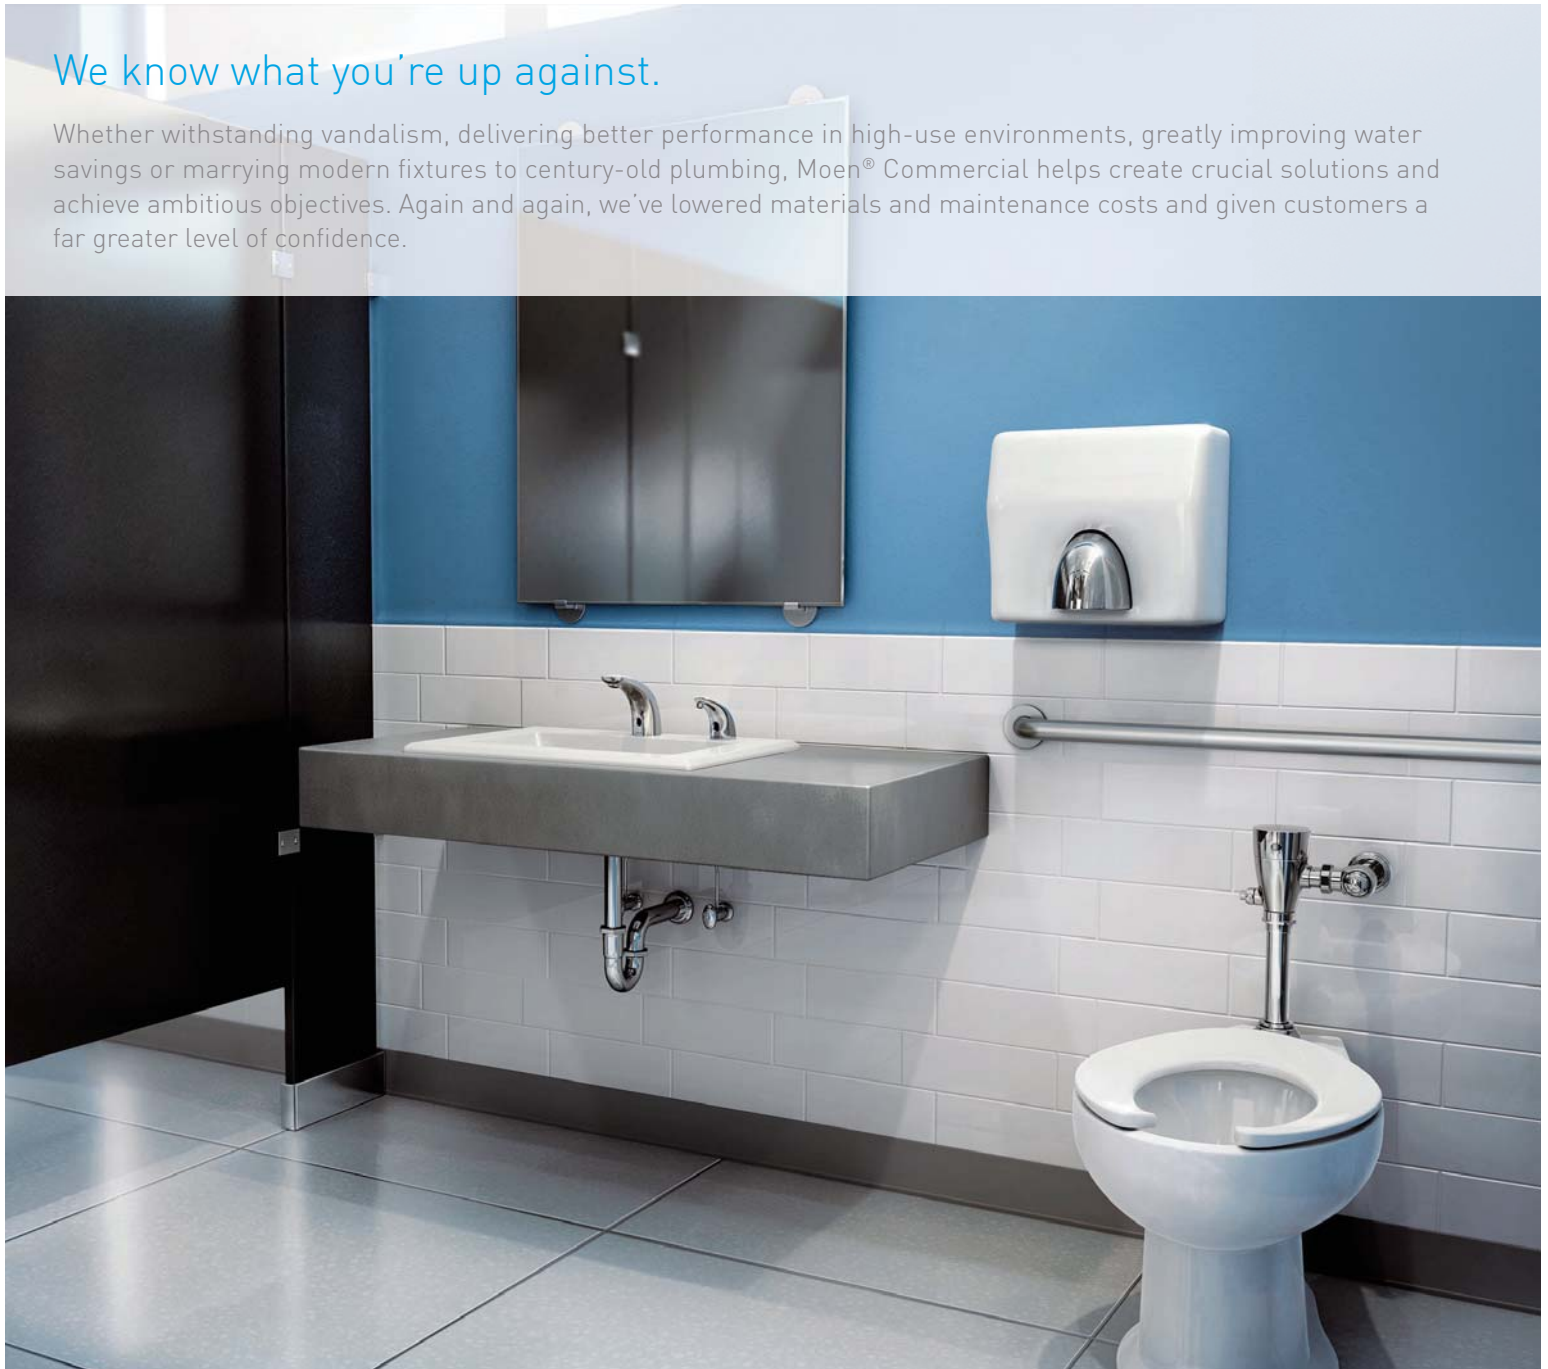

Non-drinking water faucet

confidence

We know what you're up against.

Whether withstanding vandalism, delivering better performance in high-use environments, greatly improving water savings or marrying modern fixtures to century-old plumbing, Moen® Commercial helps create crucial solutions and achieve ambitious objectives. Again and again, we've lowered materials and maintenance costs and given customers a far greater level of confidence.

“Having a functional and durable restroom is important not just for students’ health and their ability to concentrate, it’s also a sensible financial decision to reduce maintenance and water costs.”

Conrad Haller, Project Manager for Moen Commercial

Designing Bully-Proof Restrooms

By Jeffrey Lee

Specifying Moen’s vandal-resistant plumbing helps educational environments stand up to perpetual challenges. For case histories concerning university and public school system successes, see moenpro.com.

In Tom Keating’s opinion, too many school restrooms are a disgrace. The Ph.D. and coordinator of Project CLEAN (Citizens, Learners and Educators Against Neglect) saw it with both his son, who used the nurse’s bathroom because there were no doors on the stalls of his high school’s toilets, and his daughter, who didn’t have sanitary products or disposal receptacles in her middle school bathroom.

“For those students and many thousands of others, what you find is that students are starved for good, clean restrooms,” Keating says. The problem, he adds, is that a small proportion of student vandalism and graffiti ruins the bathrooms for everyone else. And when the other students see that no one is interested in helping them solve the issue, they give up.

But it doesn’t have to be this way. School administrators, facilities managers, students, and even building designers and engineers can all play a role in helping clean up school restrooms.

Having a functional and durable restroom is important not just for students’ health and their ability to concentrate, notes Conrad Haller, project manager for Moen Commercial. It’s also a sensible financial decision to reduce maintenance and water costs. Engineers and architects can help school districts minimize these costs by specifying plumbing products that resist common types of vandalism.

If a student steals a faucet handle or an aerator, for instance, facilities managers have to keep ordering replacement parts, and maintenance staff must spend

more time servicing the plumbing. Moen Commercial addresses these challenges by offering vandal-resistant features in its faucets, showerheads and flush valves.

Moen Commercial’s faucet handles are the most obvious example. Rather than using a standard Phillips-head screw to attach the handles, Moen Commercial faucets use a star-shaped Torx®-head screw that requires a special tool to remove. “The first line of defense is to not make it a standard tool,” Haller explains.

Moen Commercial aerators, showerheads and flush valves employ similar strategies. Showerheads and flush valves utilize a simple set screw that keeps vandals from disassembling them with only a wrench. Moen Commercial aerators can be removed only with a specific round, plastic tool that keys into the bottom of the aerator.

While it’s important for engineers and designers to specify these vandal-resistant features, school restrooms can also benefit from Moen products’ heavy-duty construction, Haller says. Moen faucets must meet above-code requirements in drop tests, in which a weight is dropped onto the faucet to test impact resistance. Features such as all-metal construction and locking tabs on the faucet cartridge, which keep handles from over-torquing, ensure that Moen faucets maintain not only their functionality but also their appearance and intended state.

Even if you graduated years ago, you can still play a role in cleaning up school bathrooms. Make sure to include vandal-proof features in your plumbing specs to give your designs an extra line of defense against vandalism.

“The quality and accessibility of Moen’s sales team is far superior to what we’ve experienced in the past with other brands.”

Linda Sumner, QCW Carpenter at University of Connecticut

University of Connecticut

Public restrooms can be some of the most used and abused spaces. That’s especially true in college dormitories. “The faucets and showerheads previously installed just couldn’t stand up to the level of use our dormitory bathrooms experience on a daily basis,” said Linda Sumner, QCW carpenter at University of Connecticut.

Before switching to the M•DURA™ line of commercial bathroom faucets, Sumner said the handles of the previous products kept breaking off, leaving the faucets inoperable. Now, the products can withstand the rigors of dorm usage, both at the sink and in the shower. “In addition to the bathroom faucets, we also installed new Moen products in the shower, which provide valuable water savings — a great feature not only for today’s facilities, but also for the end user, as well. Being in the dorms, products get a lot of abuse, and not only are they sturdier, they look nicer, too.”

“We couldn’t be happier with the Moen products we’ve installed,” Sumner added. “The quality and accessibility of Moen’s sales team is far superior to what we’ve experienced in the past with other brands. We know that if an issue was ever to arise, it would be handled quickly, keeping our facilities running smoothly and our residents happy.”

“We are very pleased with the performance of Moen’s new cartridge with its robust and ‘bullet proof’ design.”

Kevin Davis, Lead Plumber at Sonoma State University

Sonoma State University

Recognized by Princeton Review as having one of the nation’s 12 most “green” campuses, Sonoma State University (SSU) has opted for Moen Commercial valves, fixtures and cartridges in its new and renovated facilities.

Original plumbing hardware in the locker and shower rooms at SSU’s 65,985-square-foot Physical Education Building needed replacement, and Kevin Davis, SSU lead plumber, proposed researching and developing a time and materials cost-savings plan for the showers. Davis was able to design a 14-gallon stainless steel hexagonal enclosure that would retrofit the existing column showers and equip them with six Moen Posi-Temp® valves per column. Davis also chose Moen vandal-resistant showerheads, and the retrofit provided an immediate water-savings solution and improved performance.

“We are very pleased with the performance of Moen’s new cartridge with its robust and ‘bullet proof’ design,” Davis says. “It is a perfect fit for an institution like Sonoma State University, where there are hundreds of shower valves that must perform effectively and efficiently year-round across the campus.”

“The Moen flush valves feature a piston-driven system, which is what we were looking for, and we haven't had to service one yet.”

Bo Cohen, Head of Plumbing for Ft. Worth Independent School District

Farrington Field, Ft. Worth Independent School District

As one of the largest school districts in Texas, Fort Worth Independent School District (FWISD) has an enrollment of more than 80,000 students and approximately 125 buildings. One of those is Farrington Field, a multiuse stadium with a maximum capacity of 18,000 spectators. When the time came to renovate the facility, Bo Cohen, head of plumbing for FWISD, looked to install commercial products that were durable, reliable, hygienic and most of all, vandal resistant. He first became familiar with Moen Commercial products when he installed them in some of the district's toughest schools, where vandalism and theft were common problems.

“I have never had to replace or service the original Moen Commercial products that I installed in other FWISD facilities,” Cohen said. “When we began the renovations at Farrington Field, I knew this would be the best product for the job.”

Based on his previous experiences, Cohen knew that all-metal Moen M•POWER™ flush valves were the best choice for the stadium. Plus, the valves simplify replacement part inventory by ordering one retrofit model that is flexible enough to work in different applications. “Previously, we used a diaphragm system that needed constant servicing,” Cohen said. “The Moen flush valves feature a piston-driven system, which is what we were looking for, and we haven't had to service one yet.”

“It's reassuring to know that every time we install a Moen product, it's going to work great.”

Rick Hollis, Product Specialist at Ferguson

Metropolitan Nashville Public Schools

Not many school systems have a history as rich as that in Nashville. Its oldest school presently in operation dates back to 1806, and many buildings have understandably seen significant wear and tear.

“The maintenance team at Metropolitan Nashville Public Schools (MNPS) contacted Ferguson to assist in seeking out new lavatory faucets because their previous models weren't lasting and had to be replaced constantly (on average, every one to two months),” said Rick Hollis, product specialist at Ferguson. “We worked with Moen initially on a trial run and installed three M•DURA heavy-duty faucets in one of their most heavily used restrooms to see how long they would last. That was two-and-a-half years ago, and we've never had to replace a faucet.”

Since the trial run was so successful, MNPS moved forward in installing 400 M•DURA lavatory and kitchen faucets throughout the district. “To be honest, the Moen products have been a godsend to the Nashville schools. We've yet to replace a single cartridge in nearly three years,” Hollis added.

MNPS is now completing six-month tests of Moen Commercial flush valves and showerheads. “I have no doubt that the flush valve and showerhead trials will be equally as successful as the faucet tests,” Hollis explained. “It's reassuring to know that every time we install a Moen product, it's going to work great.”

Examples of Moen® Product Suitability for Education Environments

With products that withstand heavy use and suit any architectural style, Moen Commercial's products streamline maintenance while enhancing any school's appearance.

MoenCommercial.com will make it easier to plan your next project.

With tools for diverse trades and professionals, our site makes it simple to compare, coordinate and specify fixtures for any commercial or institutional setting.

Our site makes it easy to take advantage of invaluable resources such as these:

- **Our Online Commercial Cross-Reference Tool** allows you to search products by manufacturer and product identification number to find comparable Moen options for your commercial space.

- **Our Product Specification Binder** lets you enter a model number into the field box or browse through product categories to search and download product specs into your own online binder.

- **Our Sell Sheet Creator** lets you instantly highlight products and features.

You'll also appreciate our Accessories Cross-Reference Tool and our BIM Tool, which lets you download our full catalog of Autodesk Revit® Building Information Models. Plus, you can download any Moen catalog in PDF form from our eco-friendly Literature Center.

M•POWER™ Sensor-Operated Faucets and Soap Dispensers

Align® Below-Deck Sensor-Operated Modern Faucet / 8559
Align Below-Deck Sensor-Operated Modern Soap Dispenser / 8560

Where it's important to maintain sanitary environments and reduce maintenance in heavy-use facilities, M•POWER sensor-operated products are ideal.

Above-Deck Sensor-Operated Faucets

Updated Design: On-Trend Styling

A sleek, new look brings a modern touch to commercial installations.

Clean Performance: Improved Hygiene and Sanitation
Innovative sentinel flush purges copper waterway every 24 hours to eliminate static water. Laminar flow options further reduce chances of contamination.

Versatile: Advanced Sensor Functionality
Sensor technology stands up to high-use environments and offers a cleaning mode that disables activation for easier cleaning.

Simplified Maintenance: Above-the-Deck Access
Battery pack and mechanics are easily accessed from above. LED display informs when batteries need replacement.

Water Savings: Sustainable, Efficient Operation
Choose from several eco-performance flow rates.

Worry-Free Quality: Five-Year Limited Warranty

Below-Deck Sensor-Operated Faucets

Battery Life Extending Technology:

Longer Charge, Less Change
Battery life provides up to eight years of power with standard AA alkaline batteries.

Tool-Free Programming: Hand-Gesture Operated
Activation distance, cleaning mode, metering mode and sentinel flow can all be programmed with simple hand gestures.

Fresh Design: Modern and Transitional Styles
Delivering on both form and function, new modern and transitional designs bring a fresh look to commercial facilities.

Matching Soap Dispensers:
Features Easily Refillable Foam Soap Reservoir

Worry-Free Quality: Five-Year Limited Warranty

M•DURA™ Heavy-Duty Faucets

Modern Widespread Lavatory Faucet / 9220F12

No faucets could be more ideal for high-traffic environments that demand reliable performance than Moen® Commercial's M•DURA line of faucets.

With vandal-resistant features to help reduce your facility's maintenance costs, M•DURA faucets are built to endure the toughest treatment, and modern styling options lend a fresh touch to any setting.

Real-World Reliability: Heavy-Duty Construction
Solid cast-brass body is made heavy to last long, with added protection from a wear-resistant Chrome finish.

Tested Durability: Ceramic Disc Cartridge
Protected by a free-spinning hub and tamperproof screws, the heavy-duty cartridge features internal stops that prevent misalignment and ensure complete shutoff.

Vandal-Resistant Operation:
Options are Available with Recessed Aerators
These can only be removed by authorized personnel.

Updated Appearance: Easy-to-Clean Styling
Softened angles and lack of recesses resist dirt buildup.

Worry-Free Quality: Five-Year Limited Warranty

M•PRESS™ Heavy-Duty Metering Faucets

Eco-Performance Single-Mount Metering Faucet / 8894

In heavy-use facilities, it's imperative for metering faucets to provide consistent timing and reliable performance. M•PRESS metering faucets deliver on your highest expectations while offering updated style with cast-brass construction and vandal-resistant features.

Consistent Timing: Sealed Silicone Timing Mechanism

The sealed silicone timing mechanism is completely separated from the water source — protected from impurities and clogs — to ensure consistent timing.

Reliable Performance: Pressure-Independent Design

Even if pressure varies, you get consistent handle feel, reliable timing and proper shutoff with every use.

Superior Durability: Anti-Rotation Handle and Deckplate

Interlocking design ensures the handle will never rotate. Optional anti-rotation deckplates are available for single-mount models (8884, 8894).

Vandal-Resistant Operation: Recessed Aerator

Unique, recessed design protects aerator from tampering and damage.

Superior Durability: Heavy-Duty Construction

Solid cast-brass body and a finish that resists harsh chemical cleaners.

Worry-Free Quality: Five-Year Limited Warranty

Versatile Interchangeability:

Manual-to-Metering Conversion Kit

Convert any M•DURA™ 8200 series* faucet to an M•PRESS metering faucet with a simple cartridge and handle conversion kit.

*Excludes 8242, 8244 and new Modern Lavs

M•PRESS™

Heavy-Duty Metering Faucets

M•BITION™ Medium-Duty Faucets

One-Handle Lavatory Faucet / 8430 Series

With the M•BITION line of faucets, Moen® Commercial has achieved a balance of superior durability and attractive design.

This faucet is ideal for settings such as health care environments where residential-influenced styling adds a personal touch. In addition to their aesthetic appeal, M•BITION faucets offer the features needed to ensure lasting, worry-free performance.

LifeShine® Classic Brushed Nickel (CBN)
Available on select models

Safe Operation: Temperature Control
Adjustable temperature limit stop with durable brass construction.

Superior Durability: 1255® Duralast® Cartridge
Proprietary ceramic-disc design for smooth feel and reliable operation.

Easy to Install: Supply Line Options
Choose from standard copper or flexible supply lines.

ADA Compliant: Lever Handle
Features embedded hot/cold indicators that won't wear off.

Vandal-Resistant: Recessed Aerator
Unique, recessed design protects aerator from tampering and damage.

Worry-Free Quality: Five-Year Limited Warranty

M•BITION™

Medium-Duty Bar/Pantry Faucets

M•POWER™ Sensor-Operated Flush Valves

Sensor-Operated Flush Valve / 8312 Series

Thoughtfully designed to maintain sanitary environments and reduce maintenance, M•POWER sensor-operated products provide heavy-use facilities with efficient and hygienic solutions.

Battery Life Extending Technology:

Longer Charge, Less Change
Battery life provides up to eight years of power with standard AA alkaline batteries.

Tool-Free Programming: Hand-Gesture Operated
Activation distance, flush volume and sentinel flush can all be programmed with simple hand gestures.

Sleek Design and Function: Convenient Access Panel
Front access panel allows easy entry to battery and solenoid, simplifying installation and maintenance.

Worry-Free Quality: Five-Year Limited Warranty

M•DURA™ Heavy-Duty Manual Flush Valves

Manual Urinal Flush Valve / 8312M Series

As with all M•DURA heavy-duty fixtures, this product line's flush valves are ideal for high-traffic environments that demand the most reliable performance.

Handle stem encased in a watertight brass channel, secured by dual O-ring seals.

Heavy-duty metal stop valve with dual O-ring seals.

Built to last with vandal-resistant features and cast-brass body construction, M•DURA flush valves can help significantly reduce maintenance costs.

Longer Life, Lower Lifetime Cost:

AccuSet™ Piston Technology

Works at water pressures as low as 20 psi, so fluctuations won't lead to costly repairs. A stainless steel, self-cleaning filter protects against clogs and damage from line debris.

Maintenance Freedom:

Advanced Handle and All-Metal Stop Valve Design

All-metal handle is encased in a watertight brass channel, secured by dual O-ring seals for substantial leak protection; heavy-duty metal stop valve won't wear down or break apart like plastic assemblies.

Precise Flush Control and Water Savings:

Premium Sealing

Chloramine-resistant polymer seals prevent breakdowns and leaks, allowing M•DURA to deliver precise flush volume over the life of the product.

Worry-Free Quality: Five-Year Limited Warranty

M•DURA™

Heavy-Duty Manual Flush Valve Accessories

M•DURA™ Heavy-Duty Tub/Shower and Valves

Modern Posi-Temp® Pressure-Balancing Shower System / T9342

From college dorms to health care settings, the M•DURA showering line creates configurations for any space that will operate safely and reliably, resist vandalism and reduce maintenance costs.

M•DURA Heavy-Duty Showerheads

On the pages ahead, you'll find shower systems, shower trim, showerheads, handshowers and accessories to meet most any specifications.

Flow Rate: Standard or WaterSense®-Certified
Available in the standard flow rate — 2.5 gpm (9.5 lpm) — as well as WaterSense-certified flow rates of 1.5 gpm (5.7 lpm) and 1.75 gpm (6.6 lpm).

Consistent Flow: Polymer Channel
Water flows through an engineered channel for instant, consistent flow.

Water Savings: Supports Sustainable Operation
Saves water without sacrificing performance.

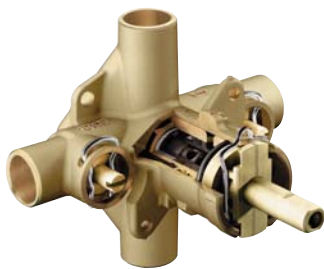

All Metal: Durable Construction
Complete metal design is ideal for heavy-use applications.

Vandal-Resistant Operation: Set Screw Design
Showerhead is locked to the arm for antitheft protection

Worry-Free Quality: Five-Year Limited Warranty.

M•DURA Heavy-Duty Tub/Shower Valves

Incredibly sturdy and hardworking, M•DURA valves function beautifully even in complex shower configurations. All are designed for easy, flexible installation.

Faster, Easier Maintenance: Integral Stops
Shut-off water supply at the valve for quick and easy maintenance.

Safe, Consistent Operation:
Graphite Composite Pressure-Balancing Design
Posi-Temp valves meet ASSE 1016 compliance requirements for controlling temperature fluctuations when paired with Moen Commercial showerheads and handshowers with flow rates as low as 1.5 gpm (5.7 lpm).

Superior Durability: 1222HD Brass Posi-Temp Cartridge
The heavy-duty brass 1222HD cartridge features superior durability, boasting exceptional strength and resistance to heat.

Installation Flexibility: Inlet Connection Options
For faster, easier install, choose from CC, IPS, PEX, CPVC and PEX Expansion inlet connections.

M•DURA™ Stainless Steel Sinks

M•BITION™ Stainless Steel Sink / 8720

Our M•DURA sinks satisfy priorities from durable construction to noise reduction. Perfect from kitchens to classrooms, our high-quality drop-in sinks come in sturdy 18-gauge and 20-gauge stainless steel that stands up to tough use.

All M•DURA sinks feature SoundSHIELD™ technology, which is a significant plus in commercial settings. Choose from double- and single-bowl configurations and a versatile range of sizes and shapes.

Durable Stainless Steel: Select 18-gauge or 20-gauge 18-gauge sinks have a wear-resistant uniform brushed finish for lasting beauty.

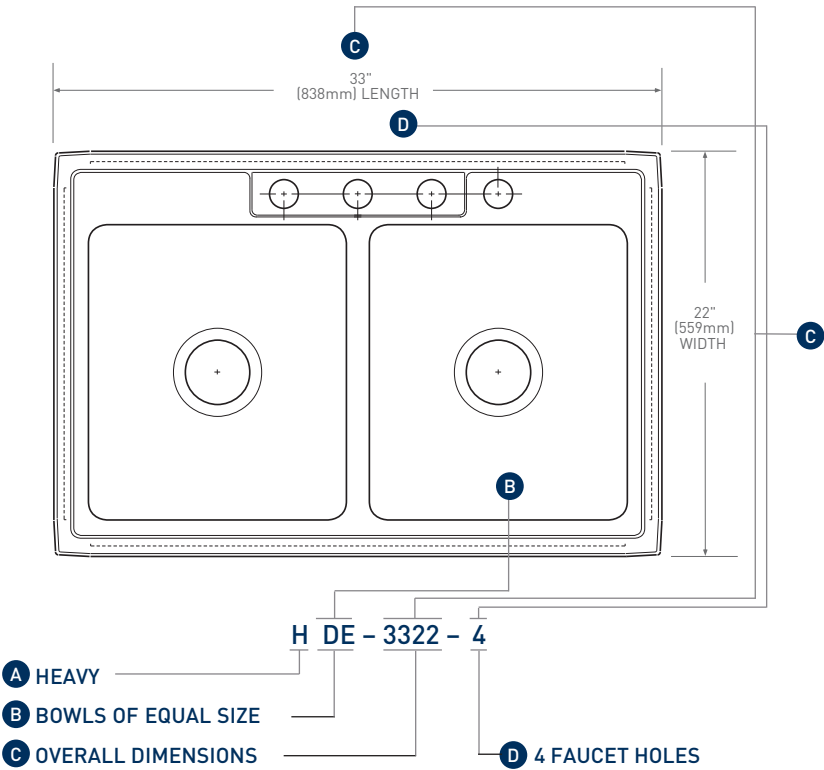

SoundSHIELD Technology: Exclusive to Moen, this sound-deadening feature reduces noise to an impressive degree.

Worry-Free Quality: Five-Year Limited Warranty

M•DURA™

Stainless Steel Sinks

The following guidelines will assist you in ordering the items needed.

A PREFIX:

The first letter of the prefix designates the type of sink.
H - Heavy – 18 gauge, 301 stainless
C - Commercial – 20 gauge, 301 stainless

B ADDITIONAL LETTERS:

Additional letters in the prefix represent the following:
DE – bowls of equal size
D – deep bowl
DEDL – extra-deep bowl on left
DEDR – extra-deep bowl on right

C OVERALL DIMENSIONS:

The overall dimensions of the sink are indicated by four numbers following the prefix. The first two numbers signify the length — from left to right. The last two numbers signify the width — from front to back.

D FAUCET HOLES:

The third section of the model number represents the number of holes on the ledge.

Notes

Although descriptions are believed correct at publication approval, accuracy cannot be guaranteed.

Moen reserves the right to make product specification changes from time to time, without notice or obligation, and to change or discontinue models.

® 1234, 1255, Align, Duralast, Envi, LifeShine, M•PACT, Moen, the Moen waterdrop logo, Posi-Temp and Moentrol are registered trademarks of Moen Incorporated.

™ AccuSet, Durameter, M•BITION, M•DURA, M•POWER, M•PRESS, SecureMount and SoundSHIELD are trademarks of Moen Incorporated.

We're here for you every step of the way.

Moen Commercial provides you with customer service as exceptional as our products. From the moment you begin working with your sales rep all the way through any warranty or maintenance questions you may have, we offer service you can count on.

Your Moen Commercial sales rep will assist you through all stages of selecting, purchasing and installing products.

BEFORE INSTALLATION

1

Explore – If you need help in finding an MRO supplier who sells Commercial products, please contact your sales representative or visit MoenCommercial.com.

2

Purchase – To place an order, please call 1-800-531-1600 or fax your order to 1-800-848-6636.

3

Track – To view your order status online or to check on product availability, visit CustomerNet.Moen.com. To enroll in CustomerNet, please call 1-888-450-5829 or email us at cncontacts@moen.com.

AFTER INSTALLATION

1

Info – The Consumer Support section of MoenCommercial.com provides useful FAQs, spec sheets and other tools to answer any questions you may have.

2

Help – The Moen Pro Support Line is available for troubleshooting or to respond to your technical questions. Call 1-877-Moen-Pro (1-877-663-6776) about your Commercial products.

3

Warranty – For warranty questions, please call 1-877-Moen-Pro (1-877-663-6776) or download a complete warranty for review at MoenCommercial.com.

Although descriptions are believed correct at publication approval, accuracy cannot be guaranteed.

Moen Commercial reserves the right to make product specification changes from time to time, without notice or obligation, and to change or discontinue models.
